Estimated Useful Life (EUL)
Table

This table lists the recommended average useful life of the categories of assets that should be considered in a Capital Needs Assessment. If an observed item is not listed, it should be assigned to the most closely related category. The Standard EUL for a component type is fixed. The user may estimate the Remaining Useful Life (RUL) of any existing component independent of the Standard EUL by entering the assessed RUL in the appropriate space on the Components tab of the Excel Assessment Tool and by justifying the assessed RUL in the adjacent Comment box. When identifying an alternative to an existing component the user may specify a EUL for the alternative which differs from the Standard EUL for that component type but must enter an explanation in the Notes space on the Alternatives tab of the Tool. Each specific component assessed is given a free-form description by the needs assessor and this description is the “Component ID” or component name which may be more specific than the “Component Type”, e.g. (a particular kind, size, etc. of refrigerator, not just any refrigerator).

Estimated Useful Life (EUL)
Table

This table lists the recommended average useful life of the categories of assets that should be considered in a Capital Needs Assessment. If an observed item is not listed, it should be assigned to the most closely related category. The Standard EUL for a component type is fixed. The user may estimate the Remaining Useful Life (RUL) of any existing component independent of the Standard EUL by entering the assessed RUL in the appropriate space on the Components tab of the Excel Assessment Tool and by justifying the assessed RUL in the adjacent comment box. When identifying an alternative to an existing component the user may specify a EUL for the alternative which differs from the Standard EUL for that component type but must enter an explanation in the Notes space on the Alternatives tab of the Tool. Each specific component assessed is given a free-form description by the needs assessor and this description is the “Component ID” or component name which may be more specific than the “Component Type”, e.g. (a particular kind, size, etc. of refrigerator, not just any refrigerator).

CNA e-Tool
Estimated Useful Life (EUL)
Table

This table lists the recommended average useful life of the categories of assets that should be considered in a Capital Needs Assessment. If an observed item is not listed, it should be assigned to the most closely related category. The Standard EUL for a component type is fixed. The user may estimate the Remaining Useful Life (RUL) of any existing component independent of the Standard EUL by entering the assessed RUL in the appropriate space on the Components tab of the Excel Assessment Tool and by justifying the assessed RUL in the adjacent comment box. When identifying an alternative to an existing component the user may specify a EUL for the alternative which differs from the Standard EUL for that component type but must enter an explanation in the Notes space on the Alternatives tab of the Tool. Each specific component assessed is given a free-form description by the needs assessor and this description is the “Component ID” or component name which may be more specific than the “Component Type”, e.g. (a particular kind, size, etc. of refrigerator, not just any refrigerator).

Numbering by ASTM 2018-08 Outline								
	System Description	Overall General Description	Component	Sub-Component	Component Description	Family	Elderly	3 tiers of categorization: Need Category, Need Item, Component Type
			4.2.3.1		LBP hazard interim control	6	6	
			4.2.3.2		LBP encapsulation (interim control)	6	6	
		4.2.4			Asbestos
